3) Main Screen Overview

• Offline view

• Online view

Top Bar

- **Left** : Username.
- **Right** : Logout button.

Controls (Right side)

- **Refresh** → Updates the current device/file list.
- **Sync Device** → Fetches newly added DOT Air devices to your account

Devices Panel(Left Side)

- **Checkbox** = Select a device.
- **Device name** = Example – DOT AIR DEMO.
- **Green Wi-Fi Icon** = Device is online.

Upload Panel(Center-Right)

- **Drag & Drop or Browse** → Select files from PC.
- **Send To Device** → Active only when at least one device + one file is selected.

Files Management (Bottom)

- **Get Files List** → Shows all files on the selected device.
- **Delete All** → Clears all files from that device (🚫 irreversible).
- **Uploaded Files** → Shows uploaded files on that device

Help Menu(Top-Left)

- Check for updates and other info.

4) Adding & Syncing Devices

If you buy a new Dot Air and link it to your account:

1. Login in **Offline Mode**.
2. Click **Sync Device**.
3. The new device will appear in your list.

5) Sending Files

To One Device:

1. Select **Online or Offline mode**.
2. Tick the checkbox of your target device.
3. Drag & Drop or Browse for file.
4. Click **Send To Device**.

To Multiple Devices:

1. Tick multiple device checkboxes.
2. Select your file.
3. Click **Send To Device** → file goes to all selected devices.

6) Viewing Files on Device

1. Select the device checkbox.
2. Click **Get Files List** → shows all stored files.

7) Deleting Files

- **Delete All** → removes all files from the selected device.

⚠ Use carefully — once deleted, files cannot be recovered.

8) Online vs Offline

- **Online Mode:** Use when connected to the internet. Allows syncing and remote transfers.
- **Offline Mode:** Works without internet on the same network. Only local file transfer.

9) Troubleshooting

- **Device not showing:** Use Sync Device → Refresh → Re-login.
- **Device offline:** Check power/USB/Wi-Fi.
- **Files not showing:** Select device → Get Files List.
- **OTP not received:** Wait 30–60s, check network.

10) Safety Tips

- Don't unplug while transferring.
- Use Delete All only if you are sure.
- Auto erase activates if the device is unplugged from USB.
- Keep software updated from **Help** → **Updates**.
